🟦 Slide 14 — Dual-Battery System

Internal Battery:
- 48–72 hours operation

Backup Battery:
- One per ATM
- Stored inside bank
- 5–7 days operation

Total uptime: 7–10 days

without electricity

🟦 Slide 15 — Offline Operation

ATM works without:

- Internet
- Network
- Electricity
- Banks

Using:

- Local Node
- Local AI
- Offline Buffer

- Emergency SIM
- Dual-Battery System

🟦 Slide 16 — Regulatory Compliance

Aligned with:

- Federal Reserve
- U.S. Treasury
- SEC
- CFTC
- FinCEN

Supports:

- KYC
- KYB

🟦 Slide 17 — Governance Model

- Government issues currency
- Decentralized network operates it
- ATMs act as independent nodes
- No bank control
- No private sector control

🟦 Slide 18 — Roadmap

Phase 1: Official app development

Phase 2: Pi Network integration

Phase 3: ATM tower design

Phase 4: AI engine testing

Phase 5: 100-ATM pilot launch

Phase 6: Nationwide deployment

🟦 Slide 19 — Conclusion

This project delivers:

- The strongest digital dollar globally
- First national currency on a decentralized network
- First offline-capable ATM
- First ATM with direct emergency link
- Disaster-proof financial infrastructure
- Zero bank manipulation

A true national monetary revolution.
